

Develop implementation framework

Application to local, state or national needs

Research

Identify knowledge gaps through monitoring

- Conversations and collaborations may be more effective originating at the local level.
- Time to focus on the ‘what could be’ rather than the ‘what is’ (thanks, Mayor White)
- Will require sharing knowledge, data, tools (includes academics)
- Will require give-and-take – ‘gradient of agreement’:

Consensus won't happen without a clear goal, process and TIME

Spring 2025 Workshop

- Let's make southeast NC a case study.
- UNCW hosted and professionally-facilitated discussion about shared sand resources in southeast NC.
- Focus on ideas - all of them.
- We want you to be there, so stay tuned
- Co-hosted between UNCW Coastal Engineering and UNCW Masters of Coastal Ocean Policy.
